PROFESSIONAL SUMMARY

Results-driven QA Engineer with 3+ years of hands-on experience testing SaaS platforms, web applications, and mobile apps (iOS & Android). Proven track record of reducing post-release defects by 30% and improving test coverage by 40% across OTT, digital media, and enterprise web products. Skilled in Agile/Scrum delivery, JIRA-based defect management, API testing, and cross-device validation. Embraces AI-powered testing tools to accelerate test creation, defect prediction, and coverage analysis. Collaborative team player who partners with developers, product owners, and stakeholders to ship stable, user-centric software on every release.

KEY ACHIEVEMENTS

- **30%** Reduced post-release defects by identifying and tracking 120+ critical/high-severity bugs in JIRA across 3 products.
- **40%** Boosted test coverage by through reusable, requirement-mapped manual test cases for SaaS, web, and mobile platforms.
- **5 days** Cut QA cycle time by via cross-team collaboration and streamlined test execution workflows in Agile sprints.
- Delivered zero critical post-release defects across 15+ production releases in the final year at HT Media Labs.
- Introduced AI-assisted test case generation using ChatGPT and Testim.io, reducing test authoring time by 25%.
- Maintained 100% traceability between test cases and business requirements across all active projects.

TECHNICAL SKILLS

Testing Types: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, UAT, End-to-End (E2E) Testing, Cross-Browser Testing, Mobile Testing (iOS & Android), API Testing, SaaS Testing

AI & Automation: AI-Assisted Test Case Generation (ChatGPT, Gemini), Prompt Engineering for QA, Testim.io, Selenium (Basics), Automation Testing (Learning)

Test Management: Test Case Design, Test Planning, Test Execution, Defect Lifecycle Management, Test Reporting, Traceability Matrix, RTM

Tools & Platforms: JIRA, ClickUp, Confluence, Postman (API), Excel, Google Sheets

Platforms Tested: SaaS Web Apps, OTT / Streaming Media, iOS (v14–17), Android (v9–14), Chrome, Firefox, Safari, Edge

Methodologies: Agile, Scrum, Sprint Planning, Backlog Grooming, Requirement Analysis, Defect Triage, SDLC, STLC

PROFESSIONAL EXPERIENCE

QA Engineer | **Hyplap IT Solution PVT. LTD.** — Mumbai

Jun 2025 – Present

- Conduct end-to-end manual testing for SaaS and multi-module web applications across functional, regression, smoke, and sanity test cycles.
- Design and execute 200+ test cases per sprint mapped to user stories and acceptance criteria, maintaining a live RTM in Confluence.
- Perform iOS and Android mobile testing to validate responsive behaviour, push notifications, in-app flows, and offline edge cases.

- Log and manage defects in JIRA with detailed reproduction steps, severity, priority, and environment tags; drive SLA-bound resolution with dev teams.
- Leverage AI tools (ChatGPT, Gemini) to draft initial test scenarios from requirements, reducing test authoring effort by 25%.
- Participate in Agile ceremonies — sprint planning, stand-ups, grooming, and retrospectives — providing QA estimates and release readiness sign-offs.

QA Engineer | **Hindustan Times (HT Media Labs – OTT)** — Mumbai

Feb 2023 – May 2025

- Executed manual testing for OTT video streaming and digital media platforms, validating user experience across Web, iOS (v14–17), and Android (v9–14) devices.
- Designed functional and regression test suites covering video playback, subscription flows, payment gateways, content management, and ad-integration modules.
- Tracked and prioritised 80+ defects per release in JIRA; collaborated daily with developers and product owners for rapid triage and resolution.
- Ran UAT, smoke, and sanity testing for 15+ production releases; achieved zero critical post-release defects in the final year.
- Performed API testing using Postman to validate REST endpoints, response schemas, status codes, and edge-case payloads.
- Maintained sprint-wise test execution reports and defect dashboards, improving stakeholder visibility into release quality.
- Validated cross-browser compatibility on Chrome, Firefox, Safari, and Edge; flagged and documented rendering inconsistencies with annotated screenshots.

AI & EMERGING TECHNOLOGY IN QA

- AI-Assisted Test Generation: Use ChatGPT and Gemini to convert user stories and PRDs into structured test scenarios, cutting initial drafting time by 25%.
- Prompt Engineering for QA: Craft precise prompts to generate edge-case test data, boundary value inputs, and negative test scenarios at scale.
- AI Defect Prediction: Familiar with risk-based testing strategies augmented by AI prioritisation to focus test efforts on high-failure-probability modules.

EDUCATION

Bachelor of Pharmacy (B.Pharm)

2018 – 2021

University of Mumbai, Mumbai, India

CERTIFICATIONS

Manual Software Testing Certification

Automation Software Testing Certification

AI for Software Testing — Fundamentals (In Progress)

CORE COMPETENCIES

Quality Assurance | QA Engineer | Manual Testing | SaaS Testing | Web Application Testing | iOS Testing | Android Testing | Mobile Testing | API Testing | Functional Testing | Regression Testing | Smoke Testing | Sanity Testing | Exploratory Testing | UAT | End-to-End Testing | Cross-Browser Testing | JIRA | Postman | TestRail | Zephyr | ClickUp | Confluence | Agile | Scrum | SDLC | STLC | Test Case Design | Test Planning | Defect Tracking | Defect Management | Traceability Matrix | AI-Assisted Testing | Prompt Engineering | OTT Testing | Automation Testing
